

STAR User Group

November 18, 2016

Welcome!

Today's Agenda:

- Understanding and Measuring Growth
 - SGP Review
- Goal Setting and Progress Monitoring
- Monitor Student Mastery
- Reading and Math Dashboards
- Say what?! Real STAR scenarios
- What's new?

Introductions

Student Growth Percentile (SGP)

- SGP describes a student's growth relative to the growth of his or her academic peers—same-grade students with similar prior achievement.
- SGP can range from 1 to 99.

What is a *growth measure*?

Achievement

- Percentile rank (PR)
- Point in time
- Compares all students

Growth

- Student growth percentile (SGP)
- *Points* across time
- Compares *academic* peers

An Example of Student Growth

Krista, Grade 7

Latest Scaled Score = 775 SS

Prior Scaled Score = 742 SS

Increase of 33 SS

How do we decide if this growth is low, typical, or high?

How is Krista's SGP determined?

How is Krista's SGP determined?

Most recent
775 SS

+33

Students with 742 SS like Krista

Prior
742 SS

AND a similar score in the 2nd prior window

How is Krista's SGP determined?

Krista grew as much or more than 42% of her academic peers.

▶ **42 SGP**

Most recent
775 SS

+33

Prior
742 SS

Less growth than Krista

More growth than Krista

Students with 742 SS like Krista

What do SGP data look like?

GREATER GROWTH

→ 66th – 99th SGP

TYPICAL GROWTH

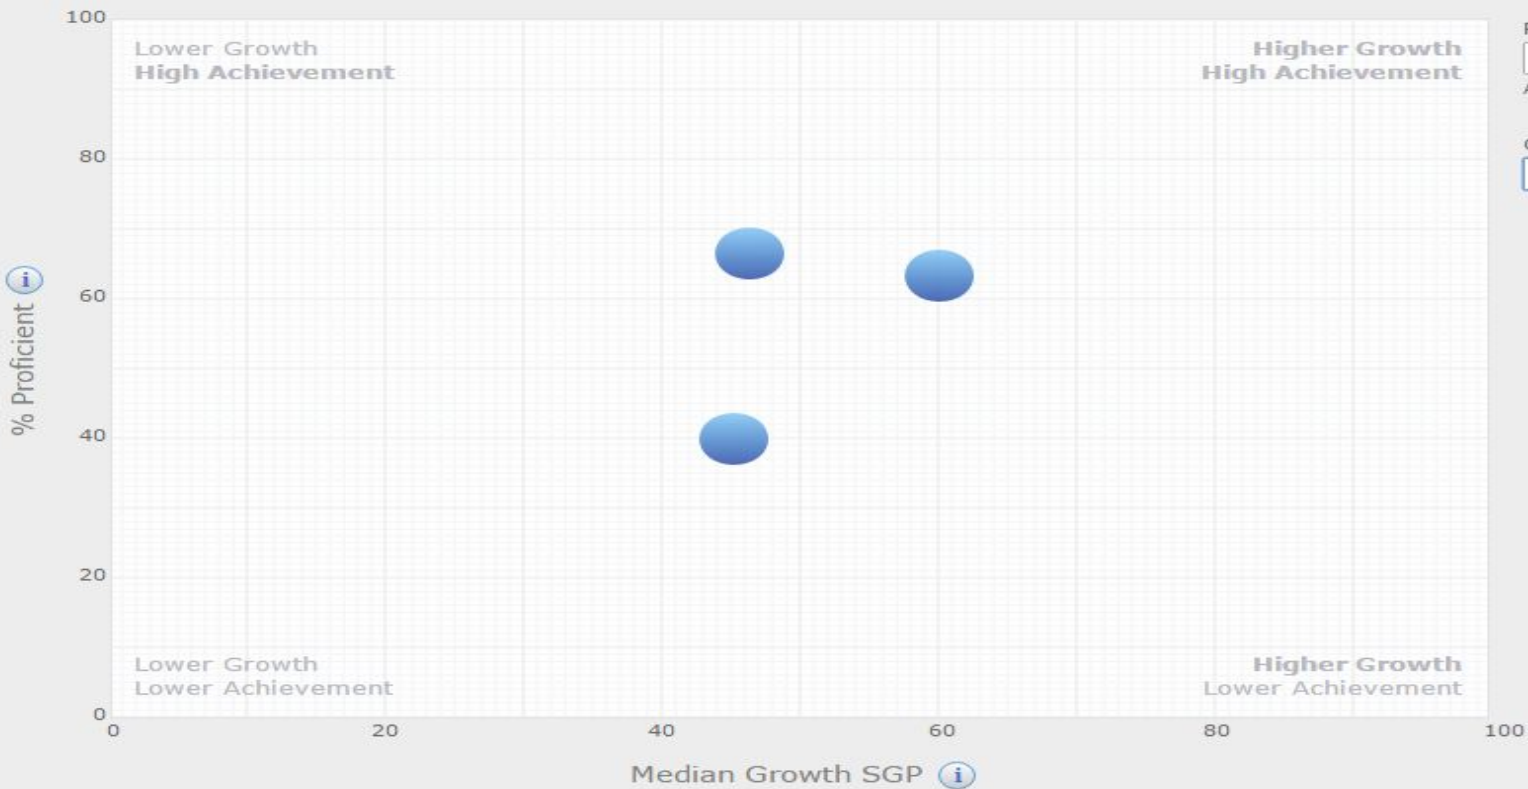

→ 35th – 65th SGP

LESS THAN TYPICAL GROWTH

→ 1st – 34th SGP

Setting Goals in STAR

Goal setting helps you put the power of data behind your decisions about student performance.

Setting Goals in STAR

- On your own, read through the Setting Goals in STAR handout
- As you are reading, highlight key pieces of information that will help you learn about the benefits of setting goals in STAR for your students
- With your table group, discuss the key benefits of setting goals in STAR
- Each table group will be asked to share one benefit that was discussed

Setting Goals in STAR

- Let's try an example....

STAR Spanish and Student Mastery

Using the STAR Reading & Math Dashboards

The Dashboard helps to answer three essential questions:

Overview

How are my students performing?

Diagnose

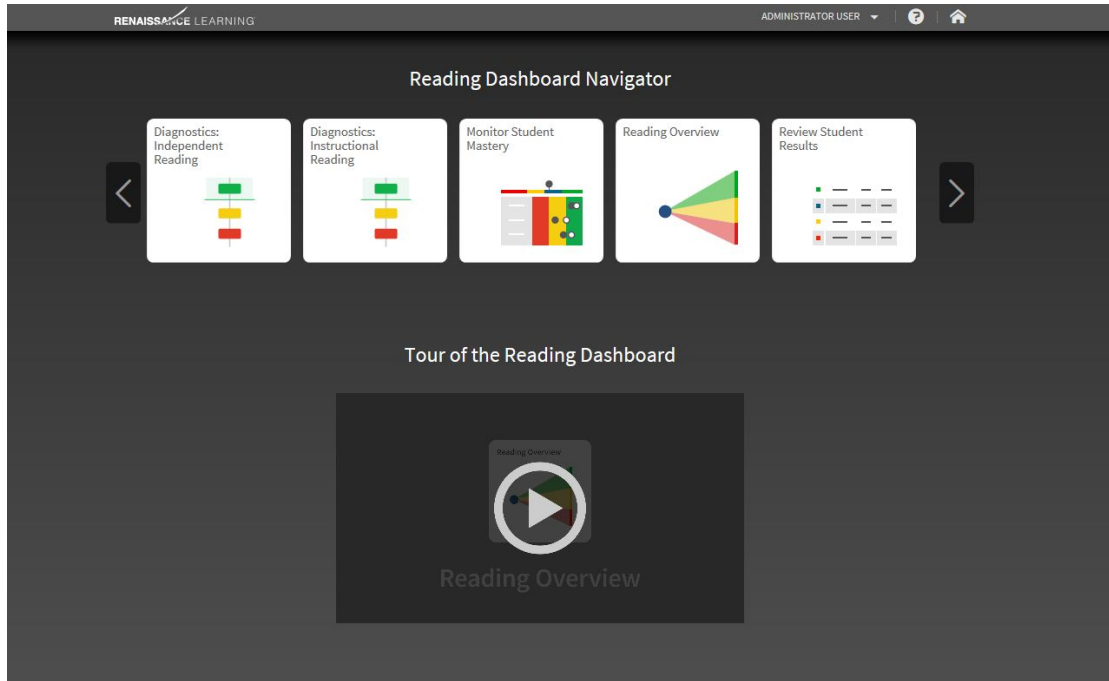

What needs my immediate attention?

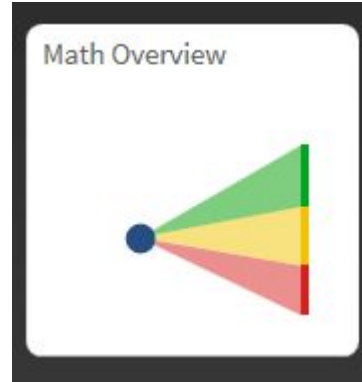

Action

What actions will move my students toward success?

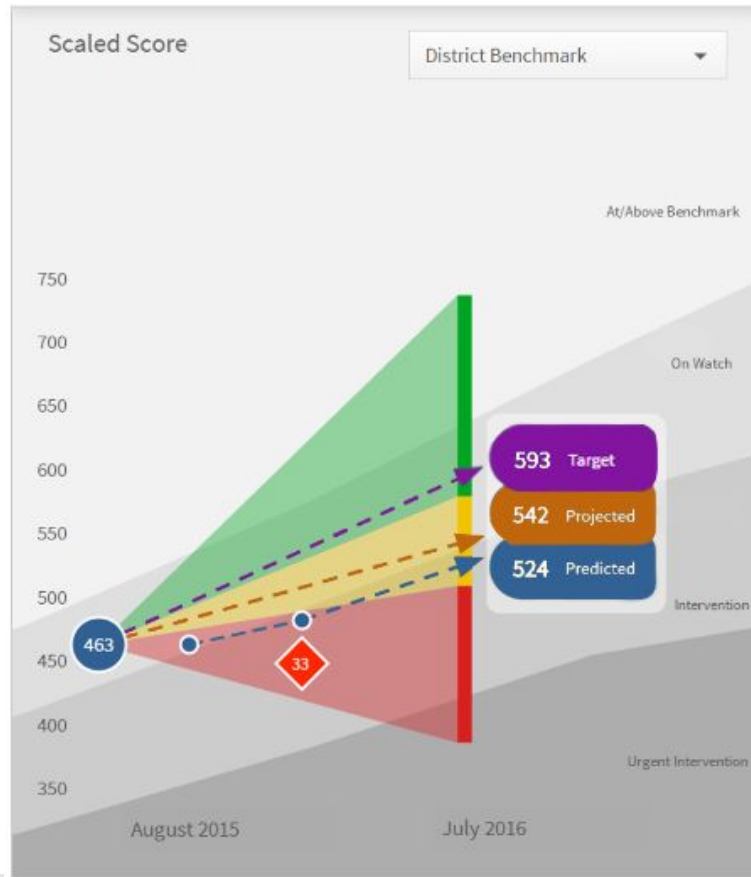

The Dashboard Overview

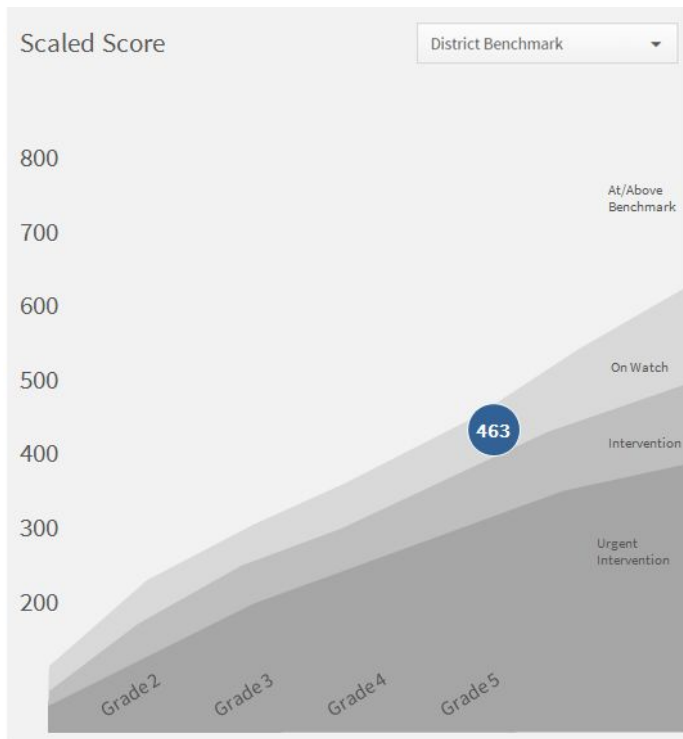

The Dashboard Overview

The Dashboard Overview

Dashboard Overview

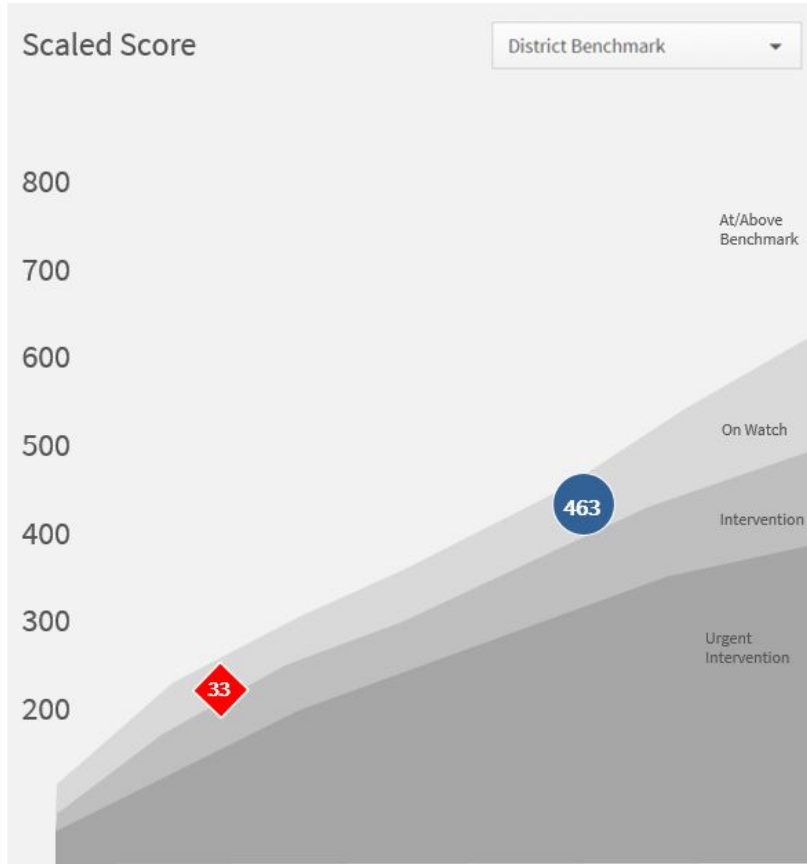

Looking at this overview what do we know?

What is the student's scaled score?

Which benchmark is being used?

Dashboard Overview

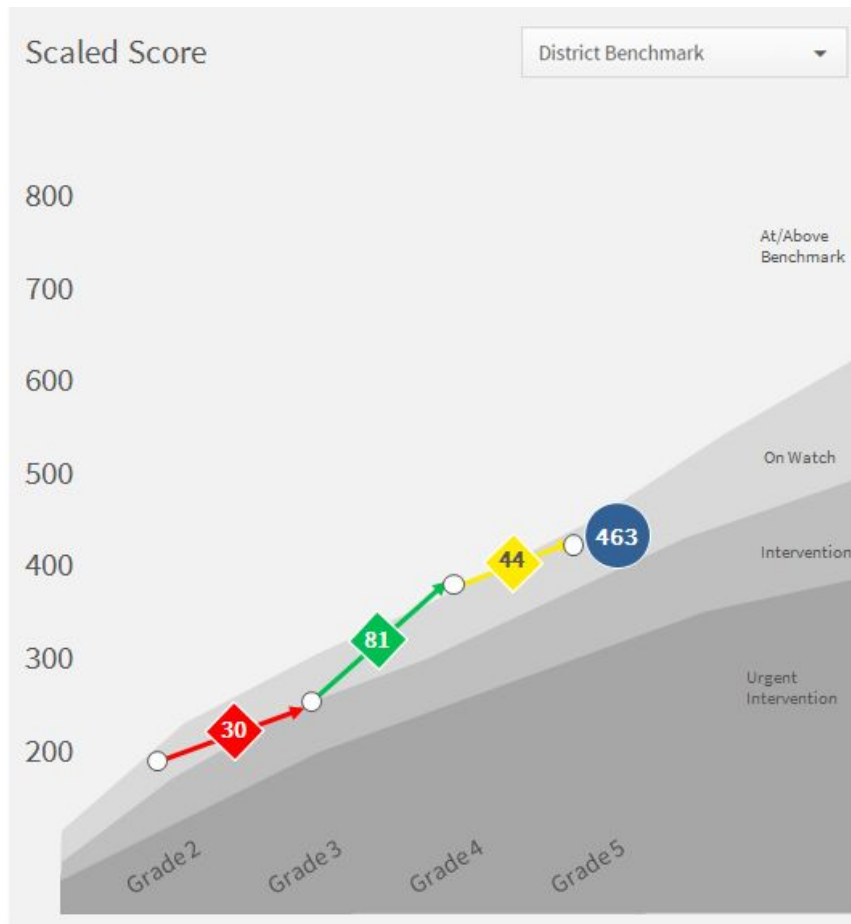

Student Growth Percentile (SGP)

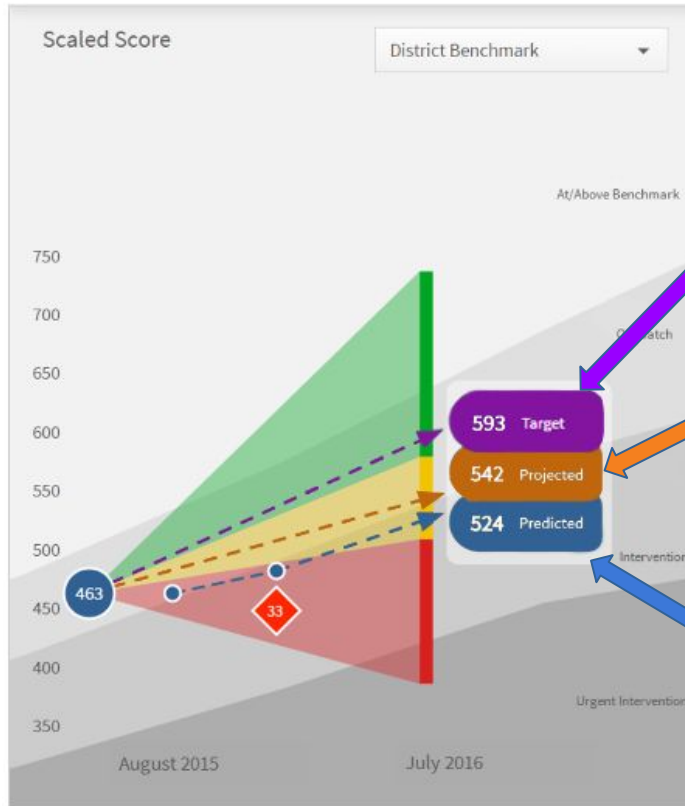

What is the student's SGP?

40 – 61 SGP “Typical” growth as defined by NYS. Nationally, “Typical” growth is 35-65.

Student Growth Percentile (SGP) history

What do these Scaled Scores mean?

Target: The Target shows what Scaled Score the student needs to achieve this year to be on track to reach or maintain proficiency within 3 years (based on state benchmarks).

Projected Score: Projected scores show the Scaled Score the student would attain if the student experienced typical growth (SGP of 50). It is based off of the first Star test of the school year.

Predicted Score: Like the Projected Score, this is based on typical growth (SGP of 50). This calculation is based on the *most recent* STAR Reading test and a prior score in a testing window within the past 18 months (such as the previous spring score).

Manage Groups

When you go to the Manage Groups page, the class that you had selected on the previous page is automatically selected on this page.

A screenshot of the Renaissance Learning "Manage Groups" page. The page has a dark header with the "RENAISSANCE LEARNING" logo. Below the header, the title "Manage Groups" is displayed in a large, bold font. A blue link with a left-pointing arrow, labeled "Reading Dashboard", is positioned below the title. At the bottom of the page, the text "I am managing groups for" is followed by a grey button labeled "Edit Selection" in orange text. A white hand cursor icon is positioned over the "Edit Selection" button.

STAR Assessments™
Dashboard Reference Guide

Record information about data and information found on the Reading and Math Dashboards.

Work with your table to answer the questions.

1. Where on the dashboard can you see if a student is meeting proficiency (achievement) expectations?
2. What are your expectations for proficiency (achievement)?
3. Are proficiency expectations the same for all students?
4. Where on the dashboard can you see if a student is meeting growth expectations?
5. What are your expectations for growth?
6. Are growth expectations the same for all students?
7. How can the predicted and projected growth trajectories be useful to you?

Review and Reflect

- How can the following information from the dashboard help you gain insight into student performance?
 - Historical data about student growth and achievement
 - Predicted and projected growth trajectories
 - Target scaled scores to keep up or catch up
 - Goal setting and progress toward goals

Say what?!

Real life scenarios from STAR

Scenario #1

STAR Reading Scores	
SS: 606 (Scaled Score) ■ Level 4	Andrew's Scaled Score is based on the difficulty of questions and the number of correct responses. The Lexile® measure is a scaled score converted to the equivalent Lexile measure.
Lexile® measure: 835L	
PR: 99 (Percentile Rank)	Andrew scored greater than 99% of students nationally in the same grade.
GE: 5.5 (Grade Equivalent)	Andrew's test performance is better than that of an average fifth grader after the fifth month of the school year.
IRL: 4.9 (Instructional Reading Level)	Andrew would be best served by instructional materials prepared at the fourth grade level.
Est. ORF: 175 (Estimated Oral Reading Fluency)	Andrew can likely read 175 words per minute correctly on grade level appropriate text.
Domain Scores	
Literature Key Ideas and Details: 99 Craft and Structure: 98	Domain scores, ranging from 0-100, estimate Andrew's percent of mastery on skills in each domain at a second grade level.
Informational Text Key Ideas and Details: 98 Craft and Structure: 99	
Integration of Knowledge and Ideas: 97	

Scenario #1

Recently a local teacher met with a parent of one of her second graders. The father, an engineer and very analytical, questioned the teacher about why, when his son achieved the 99th percentile, his data point on the colored bar at the top was in the left side of the green space rather than at the far right end. His reasoning was, “you can’t get higher than the 99th percentile.” What would you tell the parent the reason for this is?

Scenario #2

Fall 2015: GE 12.9+

Spring 2016: GE 12.9+

Fall 2016: GE 12.9+

Scenario #2

A parent is notified of her child's GE (grade equivalent) each time a STAR assessment is being given. The parent's reaction was, "I don't see why the school takes the time to assess with STAR. My daughter has been a 12.9+ for the last two school years. It doesn't tell me anything!" What would you say to this parent? Are there other pieces of information or reports you would share instead of the GE?

Scenario #2

New York NYSTP - Grade 10
